

As an Open Source user and programmer, I believe that it should be legal to write software for the Fair Use (in the legal sense) of software, and to modify the appliances I use on a daily basis. The Broadcast Flag is meant specifically to frustrate those interests. It is against my interests as a consumer, as a citizen, and as a supporter of freedom in the United States, and the only thing it offers in return is a chance for the members of the MPAA to make more profits. By supporting the Broadcast Flag, you are failing in your duty to the American people, myself included.
